

## SHOCKWAVE 28' Deck Boat

**A**fter years on the drawing board, this new 28' is Shockwave's first attempt at a deckboat—but not their first cat. The builder best known for its vees, which range from 21 to 34 feet, also offers 20' and 26' cats. The 28' deckboat is a true modified tunnel hull; it's powered by the standard MerCruiser 496 HO, although 525s are a popular upgrade. Even so, we saw speeds close to 70 mph. Roomy and expansive, this is a fully interlined boat, and you won't necessarily be able to peg it as a deckboat from eye level. Look for this boat, along with half a dozen others, to be tested later in the summer.
