**T**his 21' Shockwave is an outstanding example of today's custom boats, made specifically for economical family fun. Mark Glaser and Maggie Keenum purchased their beautiful 21' Shockwave LS in July 2000 and have enjoyed it ever since. It is powered by a MerCruiser 350 Magnum hooked to a Bravo One with a shower from Eddie Marine for cooling.

For boarding ease—particularly for daughters Caley and Corinne—they added an Aqua Step for those tubing runs. The custom factory graphics are vivid shades of red and purple.

Maggie says the boat runs in the mid-60s, and is fast enough, but completely economical. Even though it's ideal, they are presently working with Shockwave to step up to a little larger craft.

Look for the family at Havasu most of the summer. ■
